

Name _____

Date _____

Period _____

Characterisitics of Metals, Metalloids, Non-metals

Metals, Nonmetals, & Metalloids

Most periodic tables contain a zig-zag line which allows you to identify which elements are metals, nonmetals, and metalloids. The characteristics of elements can be broken down into physical and chemical, so make sure you complete your assignment correctly by paying attention to these recommendations

Go the velascience.weebly.com website, click under chemistry→ periodic table→ characteristics of elements, and use that page to fill in the blanks of your assignment, and to answer the questions below.

Metals (light green)

Metalloids (light blue)

Non-metals (orange)

Type of Elements	Physical characteristics	Chemical characteristics	Location
Metals			
Metalloids			
Non-metals			

Complete the following vocabulary words in relation to characteristics of elements in the periodic table

Brittle-

Conductor-

Corrosion-

Density

Ductile-

Dull-

Luster-

Malleable-
